PROFILE

Computer Science & Engineering diploma student focused on practical software development. Builds full-stack web applications and Android projects with hands-on work across frontend, backend, databases, notifications, and persistent storage. Current projects include StudyHub, DailyFlow, Foods Mart, and Silent Caller, while continuing to strengthen APIs, cloud computing, deployment, and software engineering skills.

EDUCATION

Diploma in Computer Science & Engineering
Hailakandi Polytechnic College, Assam

2024 – 2027
Expected graduation: 2027

TECHNICAL SKILLS

Frontend	HTML · CSS · JavaScript · React · Vite
Backend	Node.js · Express · Python
Mobile	Java · Android · SQLite
Databases	MongoDB · SQLite
Tools	Git · GitHub · VS Code · Android Studio
Learning	APIs · Cloud Computing · Deployment · Full-Stack Development

SELECTED PROJECTS

STUDYHUB Full-Stack Web Application
React · Vite · Node.js · Express · MongoDB

- Built a student-focused platform bringing study resources and academic tools together in one place.
- Developed functionality for books, notes, previous year questions, lab resources, instruments, and academic-material listings.

DAILYFLOW Android Application · Active Project
Java · Android · SQLite · Notifications

- Developed a personal routine and productivity app for daily tasks, class schedules, reminders, and attendance tracking.
- Implemented SQLite-based persistent storage with timetable management, reminder notifications, attendance percentages, and Present / Absent / No Class tracking.

FOODS MART Web Application · ~95% complete
Python · HTML · CSS · MongoDB

- Built a food-focused web application with a Python backend, HTML/CSS interface, and MongoDB database.

SILENT CALLER Web Application · ~60% complete
HTML · CSS · Python · MongoDB

- Developed a web-based project combining a frontend interface with Python and MongoDB functionality.

CURRENT FOCUS

Development: Full-stack web development · Android applications · APIs · cloud computing · deployment workflows · practical software engineering

INTERESTS

Programming · Software Development · Guitar · Music · Creative Digital Projects
